ABOUT THE PROGRAM

- At the Carbondale Area Cyber Academy, we are dedicated to providing our students a dynamic online learning environment.
- The Carbondale Area Cyber Academy was established in 2018 and currently has 40 students ranging from kindergarten through 12th grade.
- We have had three students graduate from our cyber academy in the 1st year.
- Unlike other cyber programs, we allow our students to work ahead and do not limit the amount of work a student can complete each day or each week. This allows students the opportunity to work ahead in their classes and possibly complete them early.
- Carbondale Area Cyber Academy students have the opportunity to participate in all school related activities, this includes but is not limited to athletics, clubs, class trips, and prom.
- Students who graduate from The Carbondale Area Cyber Academy will receive a Carbondale Area School District diploma and will be able to walk on stage if they choose to.

NEW THIS YEAR

- **New for the 19-20 school year, we will be providing our students with an additional layer of support by adding Cyber Coordinator – Mr. James Kielar. Mr. Kielar is a 15 year veteran math and special education teacher in the district. Mr. Kielar will be supervising our new "Virtual Lab". The virtual lab will be a computer lab located at The Carbondale Area Jr. Sr. High School, staffed by CA Cyber Academy educators. The virtual lab will be open for students to come in as needed for additional 1 on 1 help with their school work.**
- **New this year all cyber students are eligible to receive free lunch in our cafeteria.**
- At the Carbondale Area Cyber Academy, our goal is to make sure that every student is successful. We show our commitment to this goal by continuing to evolve and enhance our program.
